

We are happy to be your general contractor for your products

Polytrona AG was founded in 1967 as a manufacturer of electronic products. Since 1974 its production site has been located in Stansstad, canton Nidwalden.

### Device and apparatus construction at Polytrona

We provide you with competent consulting for your customer-specific device and apparatus construction. All assembly work is carried out in-house. Quality and Service are what we are all about.

### Potting

We pot devices or individual parts exactly according to your wishes.

### Quality and service

- dimensioning and development - complete program according to customer requirements
- construction and assembly according to customer specifications
- consecutive numbering
- testing

### The apparatus and devices are used in the following areas

- medical technology
- high voltage applications
- measuring instruments
- power supplies
- office equipment
- toys
- lighting
- domestic appliances

### Mechanical workshop

Thanks to our mechanics department we are able to respond even better to special requests. Specific customer projects can thus be carried out efficiently, accurately and reliably. Here, too, apprentices are challenged, encouraged and supported.

### Digital and pad printing

Thanks to our digital and pad printing machine, we can always offer you the best solution for your apparatus and device labeling.
